

# Liquid Relief Valves *Non-Coded*

SIZES FROM 1/4" TO 3"  
PRESSURE TO 400#  
TEMPERATURES TO 450°

Series 69 is an industry standard used for liquid relief, liquid by-pass and over protection. Series 51 and 55 are generally used where size or spacing is a factor.

## **SERIES 69**

## **Series 69, 51 & 55**

### **Usages:**

- Liquid relief and overprotection
- By-pass relief
- Continuous relief
- Pressure regulation
- Pumping systems, tanks and hydraulics
- Fluid lines
- Oil fields and chemical processing

### **Features:**

- Ruggedly constructed
- Metal-to-metal/precision lapped seating
- Closed hex cap
- Factory set and sealed (can also be field adjusted)
- Variety of inlet and outlet options
- Fixed blowdown

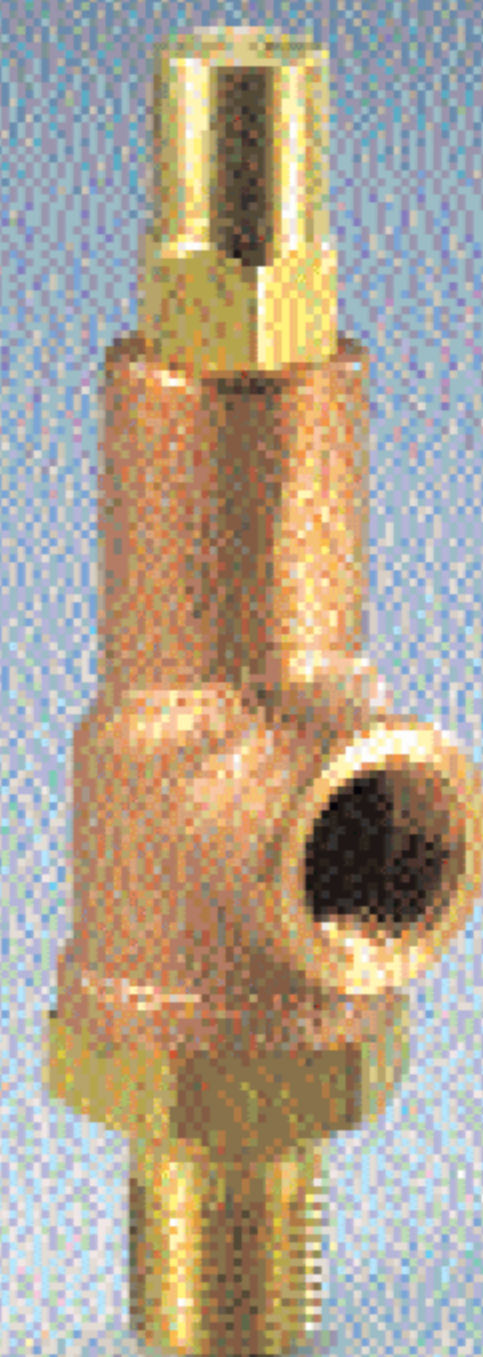

### **Options:**

- Wheel handle for ease of field adjustments
- Variety of inlet and outlets
- Stainless steel inserts for extreme corrosion protection
- Oxygen cleaning
- Polishing and chrome plating

## **SERIES 69-H**

## **SERIES 51**
