Aquatrol Valves covered through CRN

740 through 743	88 and 89
560 through 563	120 through 135
570 through 573	140 through 143

Shortening a CRN Number

The CRN number can become excessively long after all of the provinces have signed off on it. The letter "C" indicates that the vessel has been registered in the rest of Canada. The letters CL can be used to indicate that a fitting has been registered everywhere it is required to be registered. See CSA B51-14 4.3.2 Notes(2) and (3).

4.3.2(2) If a design is registered in all provinces and territories, the CRN stamped on the nameplate and marked on the data report may be shortened to include the designation of first registration plus the letter "C", e.g., K4567.5C. 4.3.2(3) If a design is registered in all provinces and territories that require registration but not in provinces and territories that do not require registration, the CRN may be shortened to include the designation of first registration plus the letters "CL", e.g., K4567.5CL. (The "L" means limited.)
